

Application Processing

Reducing costs and reallocating resources can easily be achieved with flexible, effective and efficient application processing.

Decisioning Solutions offers application processing systems that meet your challenges. Our application processing systems are web enabled 'thin-client' solutions that require no on-site software or hardware requirements and come pre-integrated to our other solutions and analytics.

Regardless of application volume, hours of operation or internal or external point of access (such as kiosks, public domains, branch or broker networks), our user-friendly application processing solutions fit today's organizational needs.

In order to meet your operational challenges, Decisioning Solutions offers two distinct application processing solutions: uProcess™ and uAdjudicate™.

| | uProcess™ | uAdjudicate™ |
|-------------------|--|--|
| Features/Benefits | <ul style="list-style-type: none"> ■ Consumer and commercial data entry ■ Commercial 'list of similars' functionality ■ Decision response in seconds ■ Proven Decisioning Solutions' security features ■ Offered as stand-alone or pre-integrated to all ■ Solutions and analytics | <ul style="list-style-type: none"> ■ Consumer and commercial data entry with robust data validation processes ■ Commercial 'list of similars' functionality ■ Analyst override capabilities ■ Function based work queuing ■ Workflow management ■ Tracking and timing ■ Decision response in seconds ■ Proven Decisioning Solutions' security features ■ Offered as stand-alone or pre-integrated to all Decisioning Solutions' solutions and analytics |
| End User | <ul style="list-style-type: none"> ■ Internal client (i.e., credit/customer care/collections analysts, etc.) ■ Deployable to existing client websites for public/vendor/broker usage | <ul style="list-style-type: none"> ■ Internal client (i.e., credit/customer care/collections analysts, etc.) |
