

# uMonitor™

Have you ever wondered or been asked how your real-time automated decisioning solution is performing at this precise moment?

Supervisors, managers, and executive members need to monitor Key Performance Indicators (KPI) related to online automated decisioning. Imagine monitoring KPI such as dynamically generated ratios, decisions per second, product or territorial take-up rates, fraud alerts, or retention decisions, in a dynamic environment.

Decisioning Solutions' industry-first uMonitor™ enables department leaders to keep their finger on the pulse at all times in a dynamic application and secure environment anywhere in the world. This dashboard can provide up-to-the-minute statistics, allowing leaders to better manage their staff and customer portfolios to maximize profitability.

From user defined KPI selection and screen configuration to setting up and managing user roles and permissions, management can now get more than reporting. The same way a stockbroker intently monitors his portfolio, so should you.

uMonitor™ - Dynamic Key Performance Indication for real-time Decision Suite™ monitoring.
