

uProcess™

uProcess™ is a straight-forward, easy-to-use, adaptable application processing system that allows on-line decisioning throughout the customer lifecycle. One-day integrations, rapid rate of deployment and convenient user access make uProcess™ a tough act to follow.

uProcess™ can either be a stand-alone solution or pre-integrated to other solutions (such as our robust Decision Suite™) for comprehensive application processing.

uProcess™ can be accessed in one of two ways:

1. As a link from your own existing website, or public/vendor/broker domains
2. Via Decisioning Solutions' uAdministrate™ client log-in center

Enter request information such as application information that may be necessary in the decisioning process (such as residential status, product type, or the channel through which the application came). Fields can be dynamically modified according to the parameters set out by individual users. As with every Decisioning Solutions product, uProcess™ is ergonomically designed and negatively tested to accommodate all types of user experience levels.

uProcess™ generates decision responses for both consumer and commercial applications. It also supports Commercial 'list of similars' functionality (provides back list of similar company identifiers for selection). Decision responses are securely delivered in seconds back to the end user.
