

uInterface™

Decisioning Solutions was founded on the premise of maximizing the power of information for effective and accurate decisioning. In order to make robust decisions, internal and/or external data is key.

That's where uInterface™ comes in. It is a full suite of off-the-shelf communication links to most major third party data repositories. Decisioning Solutions prides itself on being one of the first to provide all interfaces in XML format.

uInterface™ also offers a modular component that converts data formats from full file fixed (FFF) to extensible mark-up language (XML) for ease of internal IT intervention.

Some of the data sources available via uInterface are:

- Equifax Consumer (North American wide)
- Equifax Commercial (Canada Only)
- TransUnion (North American wide)
- Experian (North American Wide)

Please contact your local representative for further information on other available sources.

Besides 'off-the-shelf' interfaces, Decisioning Solutions also specializes in developing custom interfaces for internal and/or other external data repositories.

For further information, please contact Decisioning Solutions at Info@decisioningsolutions.com
